## Material

You can't fake comfort and performance.

Key to what we do and engrained daily in every fibre of our business is fabric selection.

We source globally and our current focus is very much on sustainability and eco-conscious choices without sacrificing on an athletes needs.

## Process & Design

Our design team has previous real world experience dramatically enhancing the client engagement process and ultimately helping to deliver a stand out product.

If you would like a design visualised we ask that you commit to an order. Design fees are a once off charge relating to a specific item and work can commence upon receiving a deposit payment.

For Enjoy to commence design work there are a couple of things we require. All logos need to be supplied in vector pdf format. We'll also need a short brief detailing any ideas, colour preferences and styling. The more information you can supply us with, the sooner we will hit the target. A draft visual is produced for each product ordered and then sent to the client for feedback and approval.

The design phase is a collaborative effort so feedback and engagement is important and part of the process.

Where possible we try and limit each design to three iterations. If you decide to deviate from your initial brief this can result in an additional design fees being accrued but these are always discussed upfront.

**ALL OF OUR RANGES CAN BE MIXED AND MATCHED.**

## Sizing

At Enjoy we suspect that the majority of our clients embrace healthy living. We therefore tailor and design from an athletic male and female figure form and then product test using keen athletes and professionals.

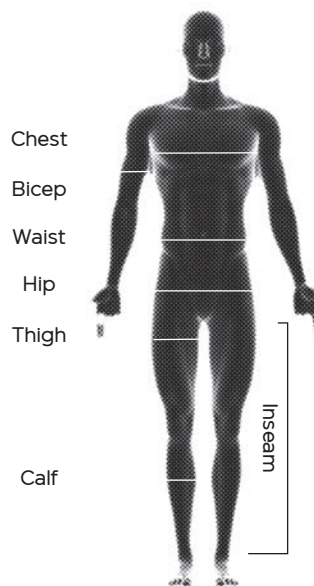

Trying to find a one size fits all solution for everybody is near impossible. The biggest single mistake people make is in assuming the medium item they already own is a universal standard. Here are some pointers to assist you in getting the perfect fit.

1. The increase between sizes is incremental so if you prefer a looser feel and you are at the top end of a size then rather size up one size. If you know you love it tight but are sitting in the crosshairs of two sizes, then possibly look to downsize to the smaller size of the two. It all comes down to personal preference at the end of the day.

2. Few people fall into an exact size when looking at the detailed measurements so the most important measurements to consider are the chest and waist area.

3. We have a full size curve at our offices in Cape Town where you are welcome to fit.

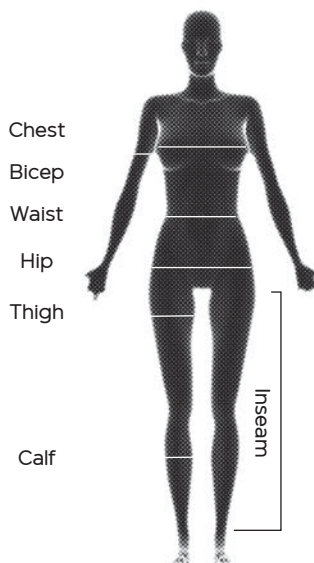

4. We fit people on a daily basis so if you remain unsure or are unable to fit please contact us if you wish to discuss further.

I've been sourcing cycling kit for years in Cape Town. Enjoy just nail it every time. Apart from their laidback and "CapeTown cool" vibe, their kit fit; design; and quality is tops. I'll be riding my 6th Epic fully decked in Enjoy kit because the fit is snug and just right.
